

Simply click, and we will respond promptly.

Our team

is ready to tackle your web tasks.

Service

Promptness:

Our company managers are always available on both personal and office phones. They are ready to respond to your inquiries and set them in motion with minimal time intervals. We do not make our clients wait, as time is money.

Responsibility:

What doesn't work doesn't break. If any malfunctions occur in the projects carried out by our studio, we eliminate them as quickly as possible. Such tasks are assigned the highest priority, and all the work is done at the expense of ClickON.

A wide range of web services:

From identity development to hosting your project on ClickON servers. You can order all the development and support of your project in one place, which is convenient and often saves your time.

Development

High return on investment:

Customer surveys have shown that ClickON solutions typically pay for themselves within an average of 4 months after launch.

Technologies:

We actively utilize technologies such as WebGL, Pinia, SSR, Babylon JS, Node JS, Rx JS, Vue 3, Typescript, and others. These modern technologies enable us to make your project highly reliable, secure, and contemporary. We aim to create a user-friendly, intuitive, and visually appealing experience for your users.

Quality:

Each stage of the work undergoes control by the project team leader, responsible developer, SEO specialist, and project manager. If there are any shortcomings, we address them promptly. Only a high-quality product is released into production.

Experience:

We started working back in 2001.

We have created over 600 solutions and earned the trust of more than 250 clients.

In 2011, we obtained IT accreditation and patented our own industry solutions.

We know how to create projects that bring benefits to businesses, whether it's sales, business automation, or presentation. We continue to evolve and improve our services for you.

Over 6 years of experience.

We have a team of 25 specialists on staff.

We have qualified specialists in the following areas of web expertise:
Development, Design, 3D Modeling, Promotion, and Advertising.

About Us

Our main focus is on providing WEB and WEB 3D solutions for businesses.

We have been operating since 2001, offering our expertise in the field.

Our team has successfully developed and patented our own software products.

We have obtained state accreditation in 2011, which further validates our commitment to quality.

Over the years, we have built a reputation as a reliable partner, earning the trust of more than 250 companies.

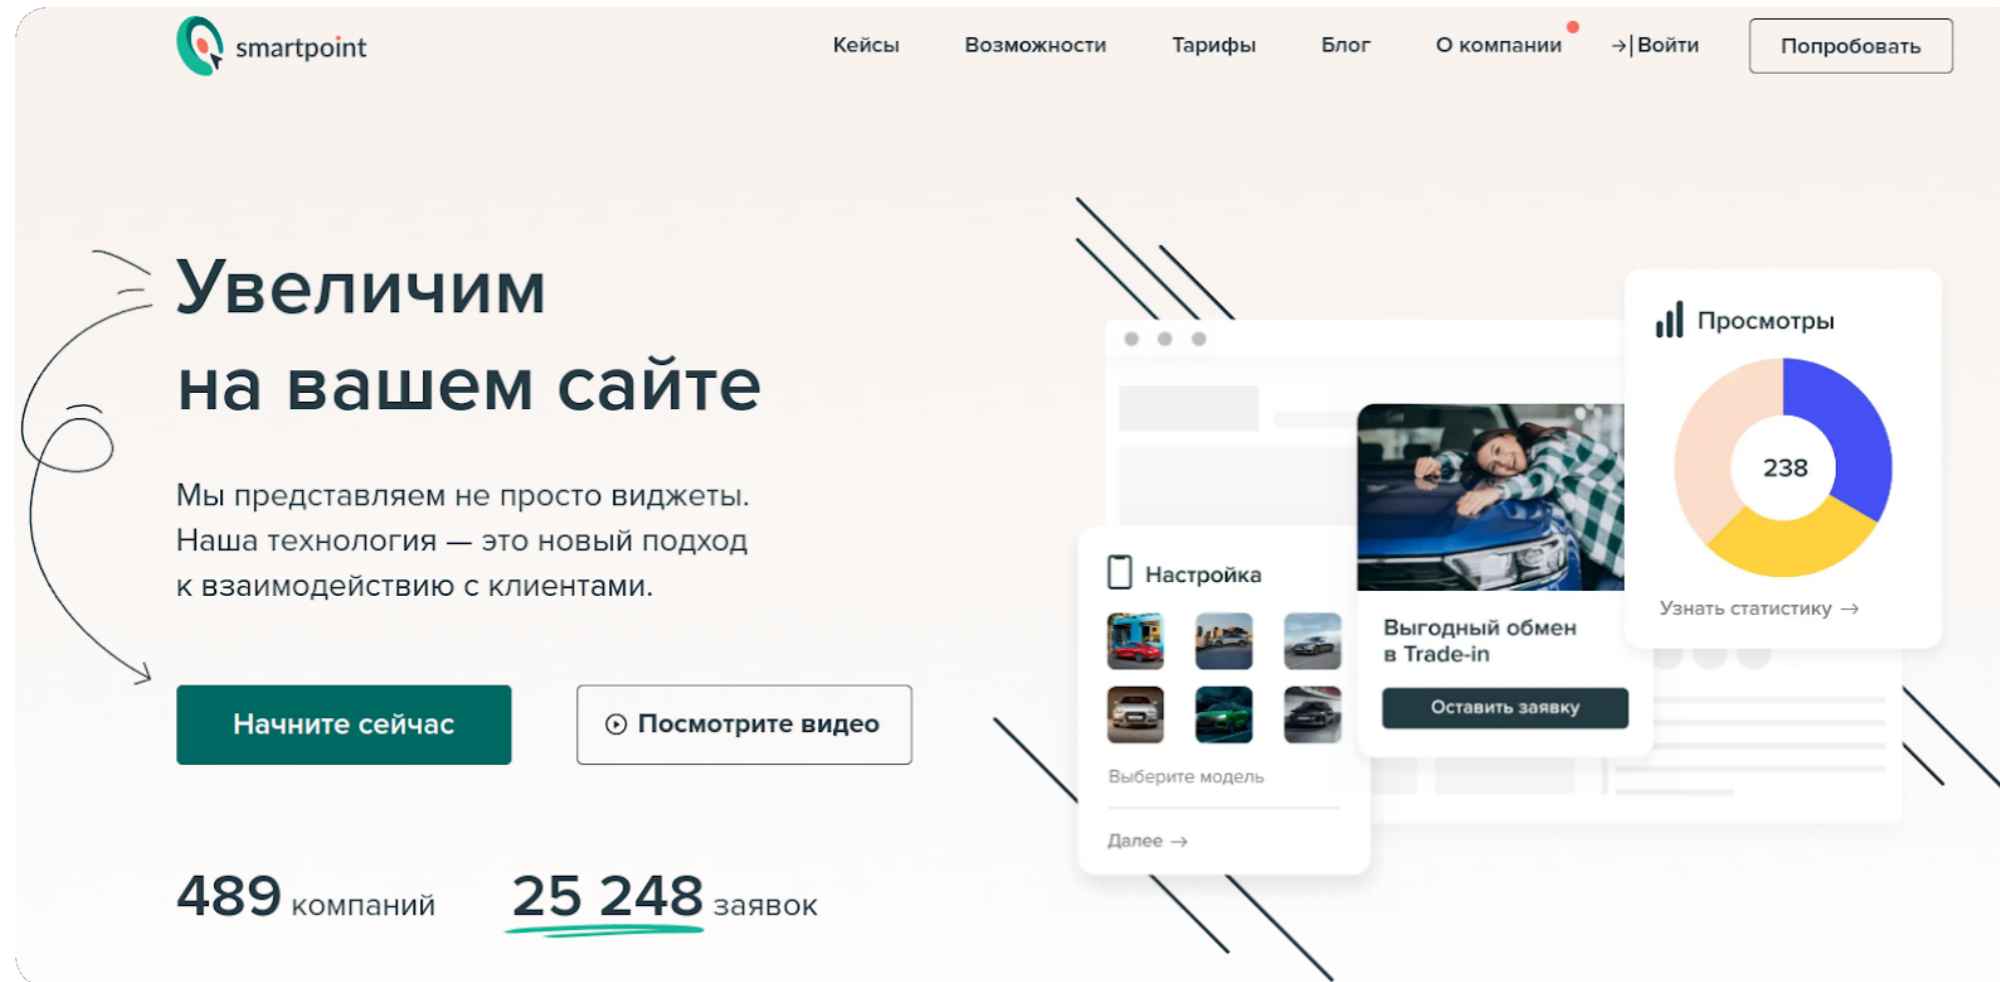

It is worth noting that 80% of our clients come to us through referrals, a testament to the satisfaction of our existing customers.

We have established partnerships with renowned IT brands, allowing us to deliver exceptional services and stay at the forefront of the industry.

Projects
that reflect the work of our team

Smartpoint Lead Generation Service

On August 18, 2017, the company "Smartpoint LLC" obtained a certificate of state registration for the program.

Smartpoint Lead Generation Service creates customizable widget windows on websites, processing over a **million daily** user requests.

A dedicated server has been optimized to accommodate the high demand.

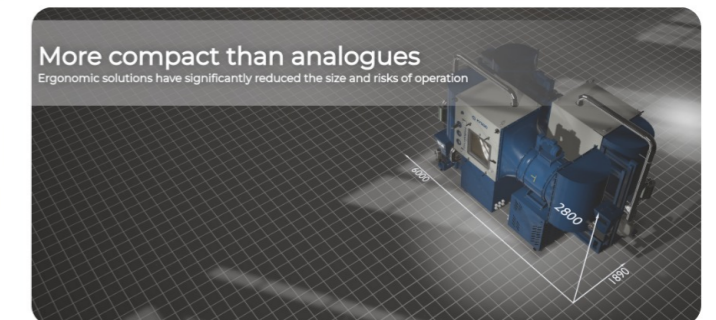

Smartpoint serves **489 monthly clients**, resulting in a significant increase of **25,000 inquiries**, particularly in the car purchasing sector.

The service helps clients **capture additional market share** and expand their industry influence.

Presentation of climate chamber

WEB 3D technology allows for the creation of unique and memorable web pages.

Three-dimensional illustrations offer more possibilities for displaying the visual characteristics of a product compared to flat images. That's why we made the decision to develop a **WEB 3D presentation** for the KPDC camera.

The virtual demonstration of the equipment helps SPETSKHOLODMASH create an environment for in-depth familiarization with the equipment. Thanks to the presentation, it is now possible to examine the equipment in great detail from **any part of the world, simply by following a link.**

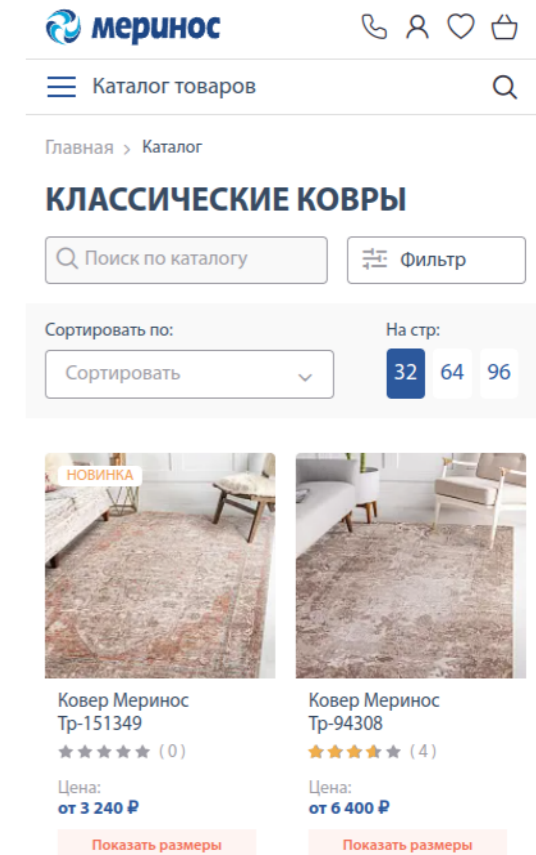

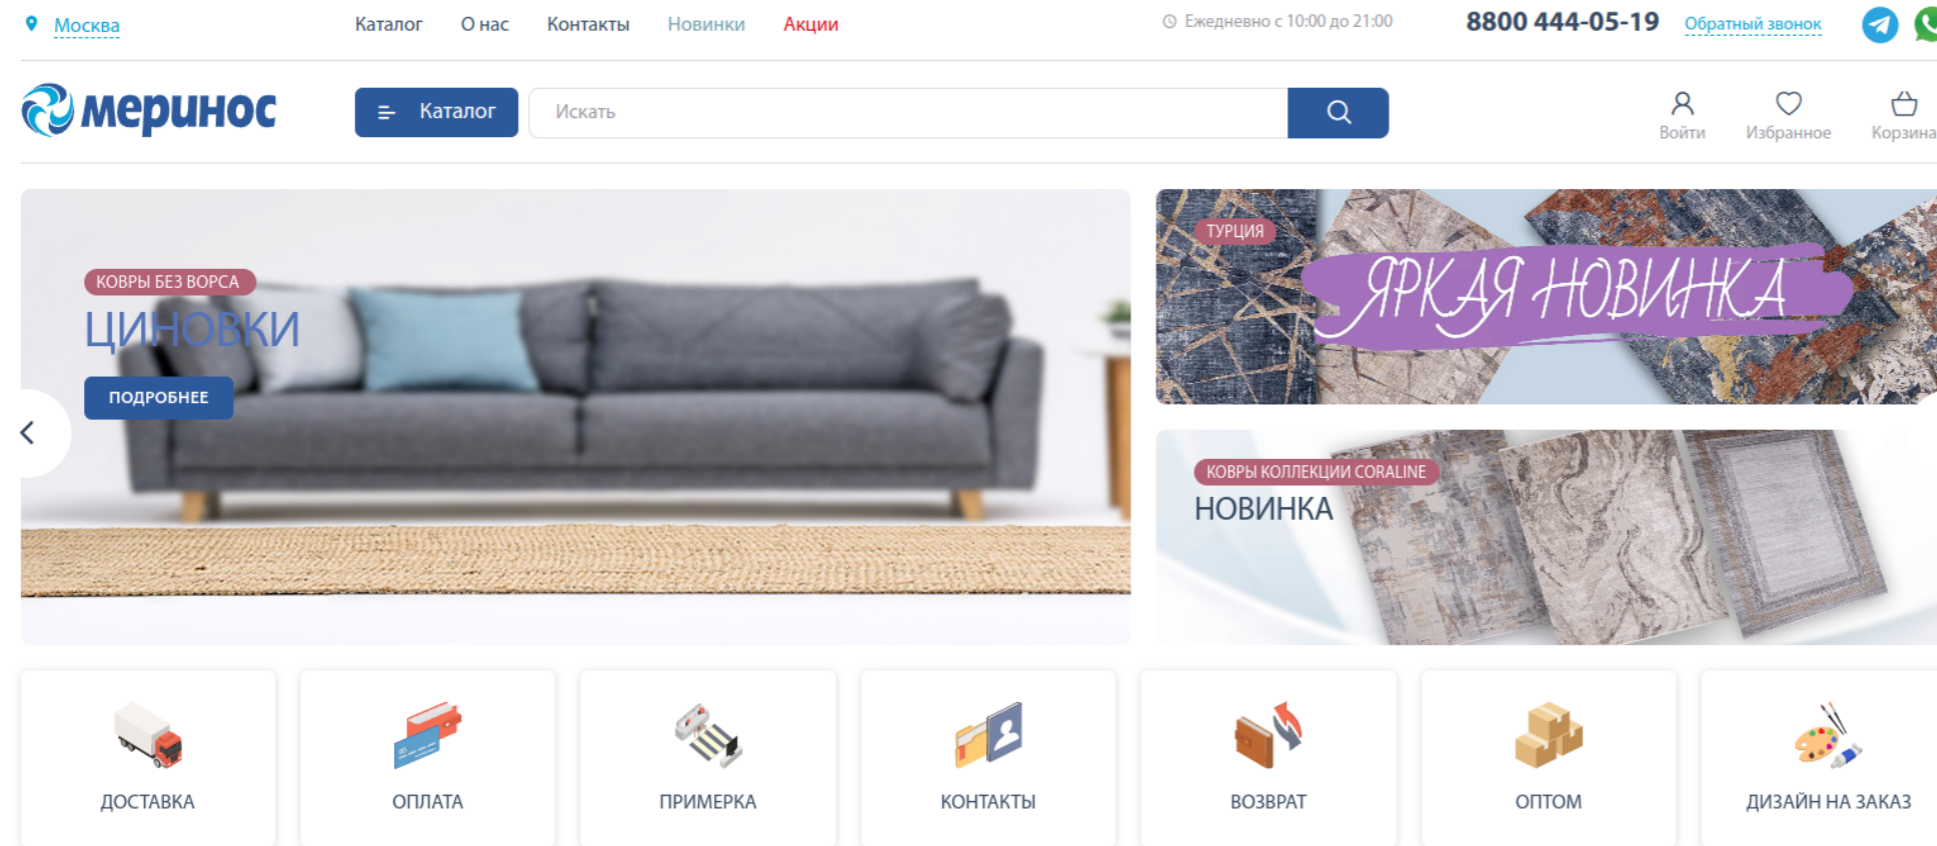

For each significant element, an animation is provided, showcasing the advantages and uniqueness of the equipment. This approach helps to captivate the visitor's attention and direct it towards the most relevant features.

Merinos Online Store

In 2019, a client approached us with a problem regarding product uploading on their website.

After examining the existing solution, we developed a new website from scratch, considering crucial aspects of their business. This approach resulted in a **100% return on investment** within six months of the website launch.

We continue to work on website promotion and further development, with over **78,000 monthly** conversions and growing.

We paid a lot of attention to the development of the mobile version of the site. Since there are many product parameters, it was necessary to create a convenient product filter and ensure its harmonious placement on the mobile device screen.

Online store Garant Climate

Client Testimonial:
 The employees of the company work positively in our opinion, and the company's director is always happy to see us when discussing complex matters. The managers, in turn, do everything possible to satisfy our needs.

NB:
 We listen to our clients and have promptly expanded the management utility "Market" in ClickON/CMS with additional filters and selections. According to the client, it is now "incredibly convenient."

We partnered with **Garant-Klimat** in 2012 and upgraded their website to an **online store** in 2014.

The website is built on the **ClickON/CMS platform**, which allowed us to efficiently implement features like multi-factor pricing, negotiation capabilities, and individual discount systems, **saving the client over 30%** in development costs.

The website generates new orders round the clock and brings Garant-Klimat **millions of rubles** in monthly revenue.

Bulletin board AIC market

The screenshot shows the website 'РЫНОК АПК' (Agricultural Market) with a search bar and navigation menu. The search results are for 'Тракторы колёсные Кировец Москва' (Tractors, wheel, Kirovets, Moscow). The search filters include 'Сельхозтехника' (Agricultural machinery), 'Тракторы' (Tractors), and 'Кировец x'. The results list various tractor models like 'Агромаш', 'Гусеничные', 'ДТ-75', 'КМЗ', 'Кировец x', 'Колесные', 'ЛТЗ', 'МТЗ', 'МТЗ-80', 'МТЗ-82', 'Минитракторы', 'Русич', 'Уралец', 'ХТЗ', 'ЮМЗ', 'Caterpillar', 'Foton', 'JCB', 'Terex', and 'Раскрыть'.

We greatly appreciate the continuous development and provision of a convenient and valuable service on our website. The studio has been instrumental in offering numerous solutions to enhance our site, many of which have been successfully implemented and are currently being worked on.

We wish the studio further growth and improvement as we still have much to accomplish together.

The classified ads board for the Agricultural Market was **developed in 2013**.

Initially, we implemented basic functionality that allowed users to post ads in relevant categories on the website. Later on, we **introduced a personal account** feature, enabling users to manage their ads, track their posting deadlines, and make edits as needed.

Working with **ClickON** proved to be fruitful for our client, as in 2019, the website experienced an average daily traffic of **2,400 visits**, attracting over **70,000 visitors per month**.

Convenience of cooperation

The technical specification (TS) for your project.

When creating the TS, we can help you describe all technical aspects or even write the entire TS on your behalf.

Our service provides a turnkey solution.

You can order everything in one place, from hosting to VR. This offers the convenience of having just one contract and one project manager, saving you time on coordinating different contractors.

We ensure only high-quality 3D deliverables.

We have an in-house team of skilled 3D artists. There's no remote work involved; we provide precise task assignments and maintain control over the process. Our specialists undergo continuous professional development, resulting in high-quality 3D models that precisely meet the TS requirements.

Personal project manager

You will always have the option to directly contact your personal project manager via phone call to stay updated on the development process.

Full Guarantee

Throughout the year, you have the opportunity to test the product. In case of any issues, we take full responsibility and promptly resolve them at our expense.

Integration

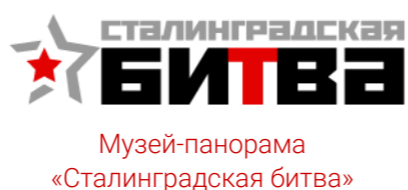

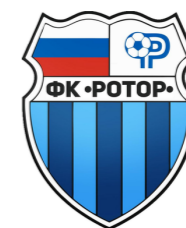

We seamlessly integrate with various systems such as accounting, monitoring, lead generation, and more. Whether it's 1C, CRM, API, products, processes, or requests, everything can be incorporated into your 3D website.
